

Taking a Second Glance at Resources Environmental Workshops for Secondary Educators

Motivating, interdisciplinary workshops geared for educators of students in grades 9-12. Participants will experience activities that can be used to help meet current science and social studies curriculum standards. Additional background information will be provided, as well as information about resources available to teachers. Formal classroom teachers, non-formal educators, homeschooling parents and scout leaders are welcome to attend. These workshops will be held at the nature center of HighBanks Metro Park on Route 23 just north of I 270.

Project WILD - Science and Civics: Sustaining Wildlife Saturday November 19, 2011 8:30 am– 4:00 pm

Science and Civics-Sustaining Wildlife, from the producers of Project WILD, is a program designed to involve students in an environmental action project to benefit the local wildlife and community. This curriculum can help students and teachers effectively meet state science and social studies standards. It is designed to involve young people in decisions affecting people, wildlife, and the habitat they share in their community through the development and implementation of a Service Learning Project. The registration fee is \$10, materials are provided by ODNR: Division of Wildlife.

Project Learning Tree (PLT) Secondary Modules: Saturday, December 3, 2011 8:30 am – 4:00 pm

PLT is an interdisciplinary approach to understanding trees, forests, and woodland habitats. The Secondary modules are set up to guide students on how to think, not what to think about complex environmental issues. Topics discussed will include: the careful use of natural resources, including how these decisions are compounded in an urban and suburban setting, risk assessment and waste reduction and disposal. The registration fee is \$10, the materials are provided by PLT-Ohio.

These workshops are coordinated by the Delaware and Franklin Soil and Water Conservation Districts and Highbanks Metro Park. The workshops are co-sponsored by the Environmental Education Council of Ohio and made possible in part by a generous grant from the Ohio Environmental Education Fund.

Additional Information

- Each session is a complete workshop including: introduction to the program, instructor led activities, participant driven learning and evaluation. All curricular materials are adaptable for many age groups.
- A continental breakfast and beverages will be provided; please bring your own lunch.
- Participants may choose to attend either or both of the workshops. You will receive a certificate of participation with your contact hours to add to your individual development plan for approval by your local professional development committee. Completion of both sessions and the accompanying assignment qualifies you for 1 graduate semester hour of credit through Ashland University. The fee is \$182 per credit hour.
- **Mark your calendar for the winter workshops –**
 Wild on Resources on January 21, 2012,
 Science Through Stories on February 4, 2012 (at Spring Hollow)
 Project WET – Water Education for Teachers on February 25, 2012
